

## Cupping Tools for Solid Rivets

"L" DIMENSION	PART NO.
3½"	-035
5½"	-055
7½"	-075
10½"	-105
13½"	-135

Tools are of uniformly high quality with accurate and consistent cuppings.

Tools are produced from only high alloy steels, heat treated to exacting standards in order to insure long tool life.

All shanks are precision ground, eliminating tool marks. The cupping forms are polished to a high lustre.

In addition to complete range of standard tools, Stephens can supply special tools to satisfy your particular needs and welcomes the opportunity to quote.
